DOUGLAS STEAMSHIP COMPANY,
LIMITED.

FOR SWATOW
The Company's Steamship

"FORMOSA"
Captain Douglas will be despatched for the
above Ports, on TUESDAY, the 24th inst., at
Daylight.

For Freight or Passage, apply to
DOUGLAS LAURIE & Co.,
General Managers.

Hongkong, 21st April, 1900. [522b]

AUSTRIAN LLOYD'S STEAM NAVIGATION COMPANY.

NOTICE TO CONSIGNEES.

FROM KOBE AND MANILA.

THE Steamship

"MARIA VALERIE"
having arrived, Consignees of Cargo are hereby
informed that their Goods are being landed at
their risk into the Godowns of the Hongkong
and Kowloon Wharf and Godown Company,
Limited, whence delivery may be obtained.

No Claims will be admitted after the Goods
have left the Godowns, and all Claims must be
sent in to the office of the Undersigned before
Noon on the 28th instant, or they will not be
recognized.

No Fire Insurance has been effected, and
any Goods remaining in the Godowns after the
28th instant, will be subject to rent.

Bills of Lading will be countersigned by
SANDER, WIELER & Co.,
Agents.

Hongkong, 21st April, 1900. [520b]

NORTHERN PACIFIC STEAMSHIP COMPANY.

NOTICE TO CONSIGNEES.

STEAMSHIP "GLENOCLE"

FROM TACOMA, VICTORIA, YOKO-
HAMA, KOBE, MOJI AND SHANGHAI.

The above Steamship having arrived, Consignees
of Cargo are hereby requested to send in their
Bills of Lading for Countersignature, and to take
immediate delivery of their Goods from alongside.

Cargo impeding the discharge of the Vessel
will be landed and stored at Consignees' risk
and expense.

DODWELL & CO., LIMITED,
Agents.

Hongkong, 21st April, 1900. [4]

NORTHERN PACIFIC STEAMSHIP COMPANY.

S.S. "DALNYVOSTOK"

Cargo shipped by S.S. Dalnyvostok in
Tacoma for Hongkong and the South has been
transhipped at Kobe and forwarded to
Hongkong by S.S. Glenogle which arrived
TO-DAY, the 21st instant.

The Cargo will be landed at Kowloon Wharf
Company, West Point Godown, whence delivery
will be made.

Bills of Lading will be countersigned by the
undersigned.

DODWELL & CO., LIMITED,
General Agents.

THE Hongkong Telegraph

HONGKONG, SATURDAY, APRIL 21, 1900.

REUTER'S TELEGRAMS.

THE WAR.

THE FREE STATE.

GOOD WATER SUPPLY.

BOERS TRYING TO INTERCEPT
GENERAL CARRINGTON.

LONDON, April 19th.

Torrential rains in the Free State
are delaying transport work, though
securing the water supply.

The Standard's correspondent at
Bloemfontein states that there are
1,000 sick in the field hospitals.

The Daily Mail correspondent says
that a force of Boers has started to
intercept General Carrington's force
in Rhodesia.

THE ASHANTI TROUBLE.

FORGES FOR THE GOLD COAST.

A force of Blue-jackets and
Houssas has been landed at Accra.
The Governor of the Gold Coast asks
for all available forces. Coomassie is
closely invested.

NATAL.

BOERS BETWEEN SUNDAY RIVER
AND DUNDEE.

Reuter's correspondent at Lady-
smith says that Boer Commandos,
estimated at 15,000 strong, scattered
over the fortified ridges between
Sundays River and Dundee are vainly
awaiting the British advance.

THE BOER PEACE COMMISSION
IN EUROPE.THE POWERS WILL NOT
INTERVENE.

The Boer peace delegates are still
at the Hague and have had an
audience with the Queen. It is
understood that their mission is futile,
as no Power will intervene.

THE CHINA SQUADRON.

H. M. S. Argonaut has been com-
missioned to replace H. M. S. Un-
daunted on the China Station.

WEATHER REPORT.

The Observatory report says:—
On the 21st at 11.55 a.m. the barometer has
risen on the E. coast of China, fallen on the S.
coast. Pressure is high over N.E. China, and
gradients are slight to moderate for N.E. winds
on the coast generally. FORECAST:—Moderate
to fresh E. winds; showery.

LOCAL AND GENERAL.

The following clipping from an Indian
exchange will interest many Hongkongites:—
Colonel Barrow, Commanding the Kohat
Kurrur Force, goes to Naini Tal as Deputy
Adjutant-General, vice Colonel Young.

BARBERS' shops in Sweden have bowls in which
one can wash one's face without using the hands.
On touching a button the water spurts up like
a small fountain, and the man who has been
shaved holds his face in it till the soap is all
washed away.

The Band of the Hongkong Regiment will
play at the Hongkong Hotel this evening, from
8 p.m. to 9.30 p.m.:

PROGRAMME.
March "Nuptial" Warrant.
Overture "The Swan" Warrant.
Selection "The Swan" Warrant.
Waltz "The Swan" Warrant.
Fandango "The Swan" Warrant.
Gallipoli "The Swan" Warrant.

MR. Joosten, the new Envoy Extraordinary
and Minister Plenipotentiary from Belgium to
Siam and China, arrived at Bangkok by the
steamer Singapore on 7th instant, and was met
by Mr. Vincent, Belgian Consul-General and
other members of the Belgian community there.
He will present his credentials to the Court of
Bangkok, and then go on to Peking.

A CERTAIN Abdul Karim Munshi tells the
Advocate of India that Lord Northcote's
arrival in Bombay is especially held auspicious
by the Mussulmans, as the name "Lord North-
cote" itself is a chronogram bearing the exact
current year of the Muhammadan era. This
method of counting the years of good and bad
events is well-known all over the Moslem
world by the name of *abjad*.

ABULLET-PROOF train, capable of travelling over
the open veldt or wherever a wheeled convey-
ance may go, will shortly be shipped to South
Africa from the works of Messrs. John Fowler
and Co., Leeds. No rails being required, the
danger of derailment is therefore obviated, and
the train will be able to approach much nearer
an enemy's position than is now possible.
The train will consist of a powerful traction
engine and four waggon, the latter capable of
being converted into a miniature fort for rifle-
ment use.

WHAT is an amateur at billiards asks a paper?
An amateur at billiards is the player who con-
stantly exclaims "What luck, I'm having!"
whose ambition is to make a six stroke; who
apologises for potting the white and calls out
"What! Whitechapel again," when his oppon-
ent does so. Who gets on the table instead of
using the long rest; and who never ceases to
explain how bad the balls are, and how dull the
cushions, and how slow the cloth; and who is
commonly heard to explain how he "can't see
a ball to-day."

Miss Julia Seaman, actress, who had a great
vogue as Hamlet in the days when Shakespeare
was "put on," but never "produced," tells an
excellent story *apropos* of the conditions that
then prevailed. For the graveyard scene the
propertyman used to give her any kind of a
skull, a different one every night. Sometimes
it was of painted cloth, stuffed with brown
paper; sometimes carved from a stale loaf and
painted. One evening, as she took it, she
heard the propertyman say, "Please be very
careful." She noticed the skull seemed light,
but as she warmed to her work, she forgot
everything and let it slip from her hands. To
her horror it floated away to the flames of the
footlights, where it burst with a loud snap. The
propertyman had given her an inflated bladder,
painted to resemble a skull!

MR. Joseph Walton, M. P. for Barnsley, who
was recently travelling in China, has been call-
ing the attention of the Government to British
interests in China. Unfortunately, this seems
to be hardly the time to stir in the matter,
when England is fully occupied with the Trans-
vaal and other South African affairs. The
Peking Syndicate was mentioned by Mr. Brod-
rick, who said that serious undertakings like
this would be supported by the Government.

Referring to Chinese internal navigation, Mr.
Brodrick said that British gunboats would con-
tinue to be employed. Apparently however,
perhaps because of some order or restriction as
to not taking any offensive action, unless abso-
lutely compelled in self defense, the presence
of these river gunboats is not taken much notice
of, at all events by pirates on the West River.

Mr. Brodrick also said that the policy of the
British Government was not to acquire addi-
tional land in China, but to keep open the
waterways.

This, however, they have hitherto failed to
do, as is well shown by the extract from the
Veterinary Surgeons' Report we published this
week.

The following promotions have been made in
the Police Force:—Second Class Inspector

Ford to be Acting First Class Inspector, vice
Inspector Hannah, on leave; Third Class
Inspector McNab to be Acting Second Class
Inspector vice Inspector Ford, promoted; Third
Class Inspector Warnock to be Acting Second
Class Inspector, vice Inspector Scott, on leave.

THE noble rage of the modern philatelist
sometimes approaches the sublime, as the
following advertisement, which recently ap-
peared in a Parisian journal, abundantly
proves:—"Matrimony: A collector of postage
stamps, possessing 12,541 specimens, desires
to contract a marriage with a young lady, also
a collector, who has the Blue Mauritius penny
stamp of 1847. No others need apply."

MRS. Annie Besant is starting a school and
college at Benares for Hindu boys. It will be
the Eton and Oxford of the East. There will
be a European headmaster and a European
principal, but the resident superintendent (who
will look after the boarders) will be a Brahmin.
Mrs. Besant has been lecturing all over India
on behalf of her scheme, and has induced
Rajahs and Maharajahs without end to form
committees and give their support.

A PAPER published in Guadalajara, Mexico,
called "La Gaceta," part in English and part
in Spanish, prints in a prominent place the
following:—

"Will the gentleman who embraced my wife
at the entrance to the post-office about nine
o'clock Thursday evening, please send me his
photograph for my 'Album of Heroes?' He
will greatly oblige."

THE steamship *Metrow* got stuck on the bar
yesterday while coming in from Hongkong,
says the *Bangkok Times* of 6th inst. Mr. Naylor
was a passenger on board, and to relieve the
tedium of waiting, a sail on a boat was suggested.
A dinghy without ballast was put over in a
good breeze, and sailed all right on the wind,
but directly she commenced to run before it,
through some mishap, perhaps too much sail,
the boat turned over, and Mr. Naylor, the
second officer, and two Chinese were left
clinging to her bottom for three-quarters of an
hour. They were then rescued from the ship.

A Daily Mail representative has ascertained
that the War Office has received information
that for some time past certain Boer command-
os have been quietly and secretly accumulating
vast quantities of stores and ammunition in
the mountain fastnesses of the Zoutpansberg
district, away to the north of the Transvaal
and adjacent to the Rhodesian frontier and the
upper basin of the Limpopo River. Here it
is believed, a number of Boer irreconcilables
may hold out and give trouble even after
peace has been declared. In order to be pre-
pared for such a contingency the Colonial Office
has deemed it advisable to enlist the services of
the bushmen of Australia, who are eminently
suited for this class of guerilla warfare.

THE SECOND INDIAN FAMINE
FUND ENTERTAINMENT.

Another most enjoyable concert, was given
last evening in the City Hall, in aid of the
Indian Famine Fund.

The house was well filled, considering the
heat, and the programme was a well varied,
and excellent one, commencing by an overture
by the band of the R. W. F. Next followed an
Indian dance of a somewhat weird character,
by the following ladies and gentlemen, in
costume, Misses Anita Dalmada, e Castro,
Hans Henderson, Sopha M. Dalmada e
Remedios, F. Dalmada e Remedios, M. Seth
and M. Sayer. Messrs. Armstrong, Danby,
Henderson, Hance, Ellis, N. Seth, Bain, and
Seth.

Mr. Grace then sang "The Bandolero" in his
usual excellent style, and responded to an
encore, by repeating the second verse.

The quartette "Brightly dawned our wedding
day," was well rendered by
Mrs. Lawson, Mrs. Gordon, Mr. Alec Marsh,
and Mr. C. H. Lammert, and met with great
applause. Mr. Walwyn, R.W.F., then woke the
house up to enthusiasm by the lively chorus
of "What Ho! she Bumps," which was taken
up and repeated by some of the audience, with
great vigour. Responding to a loud recall, he
sang "Father's got 'em."

The first part of the programme, con-
cluded with the well-known farce "The Area
Belle," in which Mrs. Borrett as the maid with
many lovers, made a spitting, and coquettish
Penelope, Mr. Sexton, as "Pitcher," the police-
man, it is needless to say, acted to the life,
while Mr. Noble, as "Toosier" was an equally
good "Tommy Atkins." Mr. Chapman, as the
somewhat stolid but romantic purveyor of
milk, acted his part well. Mrs. Francis Clark
made an excellent Mrs. Croaker. The little
play, was bright throughout, and went off with
spirit, and without a hitch.

After an interval of ten minutes, the band
played a lively selection from the "Gaiety"
and "The Runaway Girl."

Mrs. Lawson next charmed the audience
with a sweet rendering of "Ashore," and as
an encore sang a soft lullaby song.

Mr. Alec Marsh, then sang, in costume, the
"Prologue-Palace," in fine dramatic style, his
acting and singing, being alike equally good.

The programme concluded, with the better
part of the first act of the "Mikado." This
is rather an ambitious subject to attempt for a
concert, especially without a band. It is dif-
ficult too, to cut out parts from so well known
a work, so as to prevent slight lagging and
gaps. Some of the performers are deserving
of special praise, notably, the three little
maids from school, (Mrs. Hagan, Miss Stopani,
and Mrs. Borrett), and Pooi-Bah (Mr. Sexton),
whose get-up, expression, and acting are, as we
know more professional than amateur. The
scenery and dresses were particularly attractive,
the latter we understand being specially lent
for the occasion by Messrs. Kuhn and Komor.

The third and last of these entertainments
will be given this evening.

THE PLAGUE.

HONGKONG GENERAL CHAMBER
OF COMMERCE.

At the monthly meeting of the General Com-
mittee of the Hongkong General Chamber of
Commerce, held at 3.15 p.m. on Wednesday, the
18th April, 1900. Present: Messrs. R. N.
Gray (Chairman), A. Haupt, J. J. Keswick,
N. A. Siebs, Herbert Smith, and R. C. Wilcox,
Secretary.

MINUTES.
The minutes of the previous monthly meet-
ing (held 12th March), were read and con-
firmed.

RESIGNATIONS FROM THE COMMITTEE.
The Secretary reported that Messrs. H. A.
Ritchie and A. McGonachie resigned their
seats on the 28th and 29th March respectively,
and the Hon. Whitehead on the 13th April,
and that Sir Thomas Jackson, had gone home
on six months' leave.

The imminence of the annual meeting ren-
dered unnecessary any consideration of these
vacancies on the Committee.

THE REDUCTION OF CABLE RATES.
A letter read from Tientsin Chamber of Com-
merce, dated 13th February, acknowledging
receipt of Chamber's circular letter of 10th
August and 6th Oct., and enclosing copy of a
resolution passed at their last committee meet-
ing on the subjects of cable rates.

Also read letters from the manager in Lon-
don and the manager in China of the E. & O.
Telegraph Co., transmitting copy of the
letter addressed by the Eastern Telegraph
Company Limited to the General Post
Office, setting out the basis on which the
Associated Companies are prepared to negoti-
ate with the British Government for a general
reduction of tariffs to all British Colonies and
Dependencies.

A letter of acknowledgment, and thanks for
the latter had been addressed to Mr. Vonder
Plornden by the acting Secretary.

The Chairman said he thought there was
nothing further to be done in the matter for
the present, it would come up at the congress
of Chambers.

TARIFF REVISION IN CHINA.
Read letter from H. E. Sir Claude Mac-
donald, J. B. M's Minister in China, in reply
to the Chamber's letter of 22nd February,
stating that there was no truth in the rumour
that negotiations with the Chinese Govern-
ment in reference to a revision of the Tariff were
being pushed on rapidly.

This letter had, the Secretary reported,
already been published in the local Press for
general information.

PIRACIES ON THE WEST RIVER.
In connection with the above subject, a letter
had been received from the Acting Colonial
Secretary, enclosing extracts from a letter from
Vice-Admiral Sir Edward Seymour suggesting
that merchant vessels should take only enroute
from Shanghai to the sea, along which they
would have the protection of gunboats, and
asking the Chamber's opinion on the proposed
measure.

After some discussion, in which it was stated
that the masters of the steamers plying on the
river were being consulted, it was decided to
reply to the effect that so soon as the opinions
of those concerned had been obtained, an
answer would be sent to the inquiry.

JAPANESE "SAFETY MATCHES."
Read letter from the Government, received
on the 6th April, transmitting a suggestion by
the Acting Harbour Master that, in view of the
fact that two fires had occurred on board vessels
in port, in consequence of spontaneous com-
bustion of so-called Japanese "safety matches"
among the cargo, these matches should, when
the new Merchant Shipping Consolidation
Ordinance comes into force, be classed, under
its provisions, as dangerous goods.

Considerable discussion ensued on this pro-
posal, which it was thought was calculated, if
carried into effect, to divert an important trade
from the port, and it was decided to write to
the Government deprecating immediate action
in the direction indicated. It was also resolved
to bring the matter to the attention of the
Chamber of Commerce at Kobe and Yoko-
hama, with a view to getting them to urge upon
the manufacturer the desirability of making
the matches genuine "safety matches."

THE CANADIAN MAIL CONTRACT.
A letter, dated 10th April, from the acting
agent of the Canadian Pacific Railway Co.,
Royal Mail S. S. Line, was read, which an-
nounced that the contract for the carriage of
mails from Vancouver to Hongkong will expire
in May, 1901, and asked the Chamber to sup-
port the Company's application for a renewal
thereof.

The subject was discussed at some length,
and eventually, the following resolution was
proposed by the Chairman:—

"That in the opinion of this Chamber, it is
desirable the contract between Her
Majesty's Government and the Canadian
Pacific Railway Company for the carriage of
mails from Hongkong, via the Pacific
and Vancouver, which will expire in May,
1901, should be renewed, if possible with an
accelerated and fortnightly service."

Hon. J. J. Keswick seconded, and it was
carried unanimously.

POSTAL COMPLAINT FROM MANILA.
Read letter from the Manila Chamber of
Commerce complaining of the late receipt at
that port of European mails from Hongkong,
and pointing out that this arose from injudi-
cious selection of steamers proceeding *via*
Amoy.

THE YACANT SEAT ON THE LEGISLATIVE
COUNCIL.
Read letter from H.E. the Acting Governor,
dated 17th April, and received that morning,
stating that Mr. Whitehead had been granted
nine months leave of absence, and requesting
the Chamber to submit the name of a member
to fill the vacancy.

It was decided to include the nomination
at the annual general meeting of members
shortly to be held.

THE ANNUAL MEETING.
This was fixed for Monday, the 30th April,
at 3 o'clock p.m.

THE DRAFT REPORT.
Was then considered, paragraph by para-
graph, and passed.

PIRACY.

On the 13th instant, while two junks, one of
bamboo and the other of wood, were floating
down from Sze Wai in the Nam Ho district,
they were boarded by pirates who demanded
\$300 from the owners of the former and \$1,800
from those of the latter. Failing to obtain this
amount of blackmail, the pirates took a man
from each raft and sailed off to Sea Nam.

The matter was reported to the naval guard
at Sea Kwong, and a boat was sent in pursuit
who, having come up with the "junks" opened
up a brisk fire, killing one man and afterwards
capturing another. The rest escaped. On the
pirate boat was found a pillow containing
paw-tickets and some of the pirate's shirts
and trousers. These, together with the prisoners
were handed over to the Nambui Magistrate on 17th
instant. The prisoner stated that the man
killed was the chief.

LEGAL INTELLIGENCE.

SUPREME COURT.
CRIMINAL SESSIONS.

(Before Sir John Carrington, Kt., C.M.G.,
Chief Justice.)
April 21st.

The case against Tsai Tseung, charged with
unlawfully offering a bribe to a public servant
again came before the Court. His Lordship
giving the following decision upon the point of
law raised yesterday by Mr. Slade:—

In this case Mr. Slade for the defence had
objected to the indictment, on the ground that
it was too general and did not show for what
specialist the defendant had attempted to in-
fluence the conduct of the prosecutor. A fresh
indictment had been made out to which Mr.
Slade also objected on the grounds that it did not
show that the prosecutor was acting within the
scope of his powers and that the alleged offence
was cognisable by the law. The indictment
says that the prosecutor, Wilmer, a public
servant, being an Inspector of Nuisances, on the

AMOY TO TAIPER.

(Continued.)

AMOY, April 18th, 1900.

I concluded my last letter by stating I would speak on the addition of the British flag by Chinese merchants, for, in my opinion, an illegal purpose, or speaking more correctly for reasons to circumvent the Chinese like taxes. I saw white in Swatow a small steamer that traded between the different little coast ports. This steamer is owned, manned and operated solely by Chinese but at the same time flies the British flag. To the best of my knowledge, and I took pains to try and find out, there is not a single Britisher interested in her. The question naturally arises why then does she fly our flag? Simply to protect herself against Chinese official squeezes. Not for a moment do I say that is not in accordance with international custom, but it seems to me that it is a rightfully considered it is assisting Chinese subjects to resist the demands made by their government and must eventually lead to misunderstandings and suspicion on the part of the Chinese of our friendship.

THE SWATOW VOLUNTEERS.

Just previous to my arrival in Swatow, the officials and Chinese community had been thrown into a wild state of alarm by the report that 500 robbers had come into or where in the vicinity of the town. I was informed that the Chinese merchants had raised a corps out of the coolies of the place and were supporting it at their own expense. In England we believe in paying by results, but have not yet applied that system to our army. They have with this corps a man paid by the number of robbers he kills, \$10 for each private and \$100 for a robber chief, special arrangements are made if the soldiers are killed or wounded. Not much money had, however, been disbursed by the time I left Swatow.

BRITISH TRADE IN AMOY.

Amoy has so often been described and by far abler pen than mine that it would be of little use for me to attempt to do so, but I cannot pass on to the more interesting subjects of Tamsui and the Japanese occupation of Formosa, without remarking on the difference of business enterprise exhibited by the Germans and Japanese that is shown by the British firms. The former are all bustle and progress, while the latter, with one exception, are eaten up by conservatism, change being looked upon most distastefully. This is all the more to be regretted as the staple article of commerce in this port will soon be withdrawn, viz tea. On this subject, however, I will speak more fully when writing on Japanese rule in Formosa.

THE T. M. CUSTOMS.

One more point in connection with Amoy is well worth notice and deserves consideration. That is the Imperial Maritime Customs. These are hypothetical and I trust British for many years advanced and by treaty it is distinctly laid down that 75 per cent. of the European staff shall be Britishers. I was therefore greatly surprised to find that this percentage had fallen to somewhere between 50 or 60, not over the latter figure for certain. It may be a small matter, but I am certainly of opinion that it may possibly lead to our disadvantage in the near future. While speaking about the T. M. C. I may as well mention about Chapel Island Lighthouse. Mariners are well acquainted with the regulation signals given by this lighthouse in time of fog, but for the sake of our shore readers I will say that when the light-house keeps flashing the steady white light, the fire guns in prescribed rotation until answered by the steamer with three blasts. Our steamer the *Tamsui Maru* was unfortunately enough to be caught in one of these fogs and kept her whistle going constantly, but as she received no answer she anchored, and remained in this position until the fog lifted, when the lighthouse was plainly discernible about a mile and a half away. We were delayed to such an extent that it made our stay at Amoy 24 hours longer than was intended. I afterwards happened to run across an old Customs-house officer who had spent three years on this island and when I told him my story he offered me the following explanation that the fog was too high, saying, from his own experience, he had known ships lying quite close which he had been quite unable to hear if there had been a 3 or 4 mile breeze blowing on the water. He said he could hear ship's whistles far better when they were 6 or 7 miles away. As fog is very prevalent along this coast, which is also most dangerous, some remedy for such a state of things should be found.

TAMSUI AND TAIPER.

At the present time we have two most interesting object lessons we might say almost at our gates, the first attempts of two young countries at colonization, Japan in Formosa and America in Manila. It would be invidious to draw comparisons, so I will only give an idea of the progress that has been made by the Japanese. When taking a bird's-eye view preparatory to criticism on this subject, it must always be remembered that Japan, as a factor in the world's calculations is extremely young; scarcely fifty years having elapsed since her first reception of western ideas. Again it must be borne in mind that Formosa is not a colony but more correctly a conquered island. This makes a great difference. The Chinese themselves had formerly conquered the land but had never been able to make themselves absolute masters of it, in this the Japanese have had far greater success as the whole of Formosa may now be said to be in a settled state. There are still some savages, who have not tendered their allegiance to the Government, but they are comparatively few and living in the interior of the island. Actual rebels there are none, but an occasional robbery with violence still takes place. The Japanese must therefore be complimented on having attained so much good in a little over five years. There is a peculiar superstition among the aborigines (not savages) that has operated against the conquerors. It is not generally known that some 20 years ago the Dutch occupied Formosa and made their presence very beneficial felt among its inhabitants. They built forts and introduced trade, the old red brick building now occupied by the British Consulate in Tamsui is one of these old forts. Around Anping their remembrance is still venerated by the natives. They were eventually expelled by the Chinese admiral or pirate Koxinga, but they left the impression that they would some day come back again to be the saviours of the Formosans from their Chinese conquerors. This idea is still strong and though these natives have since adopted Chinese dress and manners, until very recently it was feared that should a hostile nation of war come into Formosa, the natives would mistake her for the Dutch and would rise to a man against their present rulers. I need hardly say that the Chinese do not love their former victors, and it is a well known fact that the relations between Japan and Russia are strained. Taking all these considerations into account it is not fair nor honest to expect too marked an improvement by Japan. It is true, but still there is a great improvement and one that shows unmistakable signs of future growth.

To a Britisher, perhaps, much of the system of taxation, officialism and repression calls for unfavourable comment, but it must be borne in mind that Japan is ambitious, her government is fostering trade extensively all over the world and they are spending immense sums of money.

"Money is the root of all evil" and when a country has to pay ten per cent for capital it is not hard to imagine that there will be some grumbling at the taxation by which the money has to be repaid.

To thoroughly understand the progress made in Formosa a knowledge of China and Chinese rule is necessary, a country without any of the western requisites of civilization, with a government that is no government, taxes levied in the shape of squeezes, and the people allowed to do very much as they pleased as long as they were not found out. The Japanese have altered all this. There is a government and it makes itself felt; taxes are levied on all alike; there is a strong police department everybody's circumstances being well known. Roads are built, embankments erected, railways constructed and kept in working order. This costs money and as it is not done by private enterprise the government is obliged to maintain a large staff of officials. There is no doubt about the necessity for these improvements, but it is greatly to be feared that Japan has been rather too premature. The money raised in the island is certainly spent there, but that does not have very much effect in making John Chinaman any more contented with the paying of taxes; by nature he strongly objects to pay, is endowed with a vast amount of passive endurance, and is able to live where others would starve, the consequence is that many of the tea farms are going out of cultivation. I am not acquainted with the taxes levied in Ceylon and India, but in Formosa they are \$2.70 per picul transportation tax, or *tekin*, if to Keelung, to Kobe \$1.00 harbour dues, but if to Tamsui to Amoy \$1.60 export duty. The two last taxes are not finally settled, the foreign powers maintaining that they mean preferential rates. Any way the tax amounts to \$3 a picul or \$1 a chest. Other countries impose import duties. The manufacture of tea is expensive and the freight heavy, so it can easily be seen that the actual farmer gets very little for his share of the production. He certainly gets greater facilities for transportation but he would rather put the money into his own pocket.

Japan has made a mistake; with true oriental spirit she has started at the wrong end. Instead of opening up her harbours, removing the bars etc., so that ships could enter at all times and find safe anchorage, she has started in the interior building fine Japanese cities and maintaining too many officials and guardians of the law; this, besides other great drawbacks, has left the coast practically open to invasion, so she cannot be secure in furthering her good in the interior. Tamsui can only be entered once a day, at high tide, communication between Tamsui and its port, Tamsui, though only separated by twelve miles of river can only be obtained twice daily for the same reason. Immense sums of money have been spent in Tamsui, and still nothing done as regards dredging. In Anping matters are far worse, ocean steamers cannot enter the port at all, having to anchor about four miles off in the roadstead, and in stormy weather not even that, while communication with the port is totally interrupted.

M. H. W.

(to be continued.)

HONGKONG SHARE MARKET.

HONGKONG, April 20th.

Messrs. Benjamin, Kelly and Potts, in their weekly share report state:—
The Easter Holidays have interfered with business to a considerable extent, and transactions effected have been on a very small scale. Banks—Hongkong Banks rule very quiet and are obtainable at 3 1/2 per cent. premium. The London quotation is 158 1/2. Nationals are steady at 28 1/2. Marine Insurances—Unions have strengthened their position and are wanted at 240. Yangtzes are quoted at \$128 ex the dividend of \$12 paid to-day. China Traders have been done and are wanted at \$54 1/2. Fire Insurances. There is no business to report in stocks under this heading. Shipping—Hongkong, Canton and Macao Steamboats have advanced to \$303 and after sales at \$303 have been done and are wanted at \$303. Indo China has changed hands at \$92 and are wanted. Star Ferries have been sold to a small extent at \$18 1/2. Douglas shares have been done at \$50. Refineries—We have heard of no business in either China Sugars or Lurons. Mining—Punjons have declined to \$7.10 owing to shares offering from Japan. Queen Mines have been fixed at 19 cents. Olivers B. are required for at \$4 but none are obtainable except at an advance. The Report shows a debit balance at Hongkong. Account of \$4,133.92 as against a debit balance of \$40,671 at the end of 1898. Great Eastern and Caledonians have been sold at 70 and 60 cents. Docks, Wharves and Godowns—Hongkong and Whampoa Docks are firmer and have been taken off the market at 493 and 495 per cent. premium, closing with no sellers under 500 per cent. premium. Kowloon Wharf shares have been booked at \$85. New Amoy Docks are in the market at \$203. Hongkong Hotels are quiet at \$120. Humphreys Estate have improved to \$104 sales. China Providents have been bought at \$8.85 and \$10. Cotton Mills—Hongkong Cottons have changed hands at \$38 and \$38 1/2. Miscellaneous—Island Cement has been in strong request and have been done at advancing rates up to \$31 1/2. China Boreas are in demand at \$18. Electrics can be placed at \$11. United Asbestos have been sold at \$6.75.

DEATH OF MR. C. H. MORRISON AT BANGKOK.

Mr. Chas. Robertson Morrison, the Assayer and Chief Assistant in the Royal Department of Mines and Geology at Bangkok, died on the 9th inst. For some time past he had not been in his usual health, and early in the present month was removed to the Nursing Home, suffering from malarial fever with typhoid symptoms. Nothing that could be done for him proved of any avail, and late on the night of the 9th he breathed his last. Mr. Morrison was only 25 years of age and had not been quite twelve months in Bangkok. Much regret is expressed at his untimely demise. The funeral, which was attended by a number of Siamese as well as foreigners, took place next day at the Protestant Cemetery.

THE ROLLING OF SHIPS.

The "Transactions" of the Institution of Engineers and Shipbuilders in Scotland is an unpretentious publication, but always contains at least one interesting paper. To the last Mr. W. L. Luke contributes an article on the means adopted for moderating the rolling of ships. We pretend to understand the theory of a ship's stability, although constant instances of some great blunder in a costly yacht or line-of-battle-ship remind us now and then that theories, however true, require at least some careful application than our ship designers often give them; and much depends upon a vessel's form when oscillations or stability conditions are in question. But here our problem is more circumscribed. Given a vessel of a certain form

and definite position of the meta-centre, what can be done to check excessive rolling? The most obvious and commonly adopted method is the addition of bilge-keels. Wooden sailing ships of war, as well as merchant vessels, in the first half of this century, were always constructed without bilge-keels. Doubtless the deep and heavy ordinary keels which sailing vessels necessarily demand sufficiently checked rolling. Besides, we now load decks with heavier guns and think more of our sailors' comfort. The ill-fated *Atlanta*, herself replacing the *Eurydice*, which was capsized in a squall in 1878 off Ventnor, was found to roll so heavily that she was fitted with two pairs of bilge-keels—one below, and one above the water-line. They checked the rolling, but still she rolled sufficiently to lift the lower out of water, and thus repeated violent shocks strained all the fastenings and caused intense discomfort. The bilge-keels were removed, she left Bermuda for the British Isles in February 1889, and was not seen again. The French claim to have used bilge-keels at the commencement of the present century; but these were probably intended, at that time, to act as lee-boards.

From the earliest days of iron clad ships bilge-keels have been fitted in the Navy. After the capsizing of the *Captain* in 1870, Mr. Froude made a full series of experiments upon a model of the *Devastation*. The experiments in dock seemed most conclusive. With no bilge-keels, after a deflection of 8 1/2°, the double rolls were taken before she came to rest. With one 3-foot bilge-piece only 8 1/2°; with two 3-foot bilges 6°; with one six-foot bilge only 4°. But we must very carefully examine experiments on models made in dock. When the deflection was increased to 20°, the oscillations were, respectively, 20, 6, 31, or always less than when this first displacement was much smaller! This paradoxical result was doubtless brought about by two factors of experiment. The greater model flooded the docks to some extent, and the water found its exit through the scuppers, the tilt was checked enormously; again waves formed by tilting in the dock, reflected from the wall, may check or help the rolling.

The model was also tested in a sea; and, though results were very different, they clearly showed the bilge-keels greatly checked the rolling. Far more decisive were experiments made with the *Greyhound* and her sister ship the *Perseus*. The former had a pair of bilge-keels; the latter none. After they had been brought to the same draught and meta-centre height they were taken out into Plymouth Sound on fine weather occasions. The *Greyhound* rolled to about half the angle reached by the *Perseus*, the latter sometimes rolling as much as 25 degrees.

The accidental discovery on another occasion that water let in through imitation shot holes greatly checked the rolling—and the effect, noted above, of water on the model's deck in dock—suggested experiments into which water might enter and, by its weight, check oscillations. This has been actually tried and proved most efficacious in preventing rolling; but it adds a serious danger. When big waves were run into the ship capsize her, she usually goes over on her water roll, borne down too low to rise against the coming wave—and such admitted water helps this danger. Bilge-keels so far have proved the best, but they must not be placed too near the surface. If liable to be exposed, violent shocks, of course, will follow, and even if they come but near the surface they greatly add to the effective hold the vertical component in a wave has to tilt up the ship; and therefore, though they often check, in such position they might sometimes increase, the rolling.

HORRORS OF THE BATTLEFIELD.

LONDON, March 12th.

For real ghostliness, for a glimpse into the glory of realities of war and the horrors of the battlefield, a private letter from a young medical officer at Spion Kop, printed in the *Daily Graphic*, can scarcely be beaten. "I selected a pass," he writes, "overhung by steep cliff banks on the top of which I got up a Red Cross flag. Cases now began to pour down from Spion Kop on stretchers. The Boers opened fire on us, and three bullets went into the fire, knocking the sticks about. The reason for this fire was not the Red Cross flag, but owing to some Tommies who were strolling over to it, but I promptly ordered them away. A few minutes after the Boers let fly five shells in quick succession in my direction, but they fell short and did no harm.

"From this time to 1 o'clock next morning wounded came through my dressing station, as the pass was the only exit from the hill. I saw every case, and some of them were MUTILATED BEYOND DESCRIPTION.

Fully 330 wounded and dead passed through my hands. Many poor chaps shot in the morning in the front trenches, who could not be reached, lay in the blazing sun all day. One old colonel in Thornycroft's walked down, leaning on a rifle. He was a mass of wounds, one ear had been blown off by a bullet in his neck, and chest through by others and his back and legs torn by shells. He came in and said he just dropped in to let me take his finger off as it was so shattered that he could not pull the trigger of the rifle, as it got in the way of the next finger, which he could use, for he wanted to get back up the hill to pay the Dutchmen back. Of course I would not let him go back. "Bullet wounds are beautifully clean, just a round hole, and, as a rule, do not do much damage as they often go through the bone without shattering it, and do not bleed much. Shell wounds are hideous.

It was now frightfully dark, and I put one of the lanterns on a stick as a directing light to my aid. One of a group of soldiers returning to the hill tried to run away with it. Shortly after this both lanterns went out, and I had

A PRETTY BAD TIME, as the pass often got blocked with wounded. Finally I could run no more and died across the drift, and had to stack them with the dead in rows on the grass. I collected the wounded officers on stretchers and gave them brandy and hypodermic of morphia.

Commandants Botha and Duggess, the Boer generals, came up at daylight. The former, who is chief general, was a small thin man with yellow beard and hair, and had a magnificent rifle beautifully carved with his name and a text from the Bible. He had a couple of mounted Kafirs carrying ammunition and a water bottle, and an interpreter. He seemed, however, to understand English, though he refused to speak it. There were quite a number of German officers. I saw at least one of them had been killed. They let our men search the dead for identification cards, letters and money. Several Boers handed in little things they found."

FRANCE ASKS FOR TROOPS.

NEW YORK, March 15th.

The *Journal and Advertiser* has a special from London which says: "A private telegram from an unimpeachable source in Paris says that the minister for the colonies sent cipher cables yesterday to the governor of every French colony asking, almost in the words of Chamberlain to the British colonial governors, how many soldiers were available for immediate service."

BISHOP POTTER ON CHINA AND JAPAN.

NEW YORK, March 16th.

Bishop Potter talked to newspaper representatives to-day about his visit to the Philippines, Japan and India. The trip was made at the instance of the committee on increased responsibilities of the Protestant Episcopal church. He had been most interested, he said, in the condition of affairs in China and Japan. He had noticed a gradual friendliness between the two nations, and prophesied that when Japan should have taught the Chinese the art of war, neither England, Russia or Germany would decide the fate of the East. The Chinese did not love the Japanese, but recognizing that they had nothing to hope from the European nations, were gladly establishing an *entente cordiale* with the Japanese.

Referring to the Philippine situation, Bishop Potter said he had gone into the islands in an attitude of antagonism. He declined to say whether or not his opinions had altered, but said he recognized the question as purely an academic one.

Asked about the future of the Anglican church in the islands, Bishop Potter said he saw no reason why it should not be successfully introduced to the natives. He had found no evidence of any paganism. The Roman Catholic religion was pretty generally observed, and as education spreads, the tenets of the Anglican church would receive general acceptance.

A MARVELLOUS ESCAPE.

There was great excitement at Jhind the other day, says an Indian contemporary. Mr. Van Tassel, the balloonist, made an ascent there. About the time of making the start three spears belonging to the Jhind State, who were holding the balloon down, got mixed up with the ropes of the balloon and parachute, and were carried up into the air. One man fell soon; but the other two were not able to get loose. When at a great height one subsequently fell, but fortunately again got caught in the ropes. Mr. Van Tassel, with great presence of mind did not cut himself off with the parachute, as he would have done under ordinary circumstances, but holding on, shouted to both men to hold tight. The balloon ascended to a great height, when the gas cooled and it began to descend. The parachute opened, and the empty balloon also formed a parachute, and the three men descended safely to terra firma amidst the wildest excitement of the large crowd assembled to witness the ascent.

SHIPPING REPORTS.

Capt. James Potter, of the steamship *Benvenue*, from Saigon, reports:—Experienced light variable winds and fine clear weather throughout the passage.

Capt. J. Douglas, of the steamship *Formosa*, from Swatow, reports:—Light easterly winds, smooth sea and hazy weather. Vessels in port—*Singap, Saechuen, Cheong Hock Kian, Chowai, Tientsin, and Kweilin*.

Captain A. S. Calder, of the steamship *Phrang*, from Bangkok, via Swatow, reports:—Light variable winds and smooth sea throughout, until making and leaving Swatow when calms and foggy weather prevailed.

NOTANDA.

CALENDAR.

APRIL.
Meteorological means based on ten years' observations to 1899.
Barometer 30.059
Thermometer 80.0
Humidity 85.5
Rainfall 4.08

TO-DAY.
WEATHER REPORT.
On date at 10 a.m. On date at 4 p.m.
Barometer 29.99 29.99
Temperature 78 73
Humidity 84 94
Rainfall — —

TO-DAY.
Saturday, 21st April, 1900.
Chinese—22nd of 3rd moon of 26th year of Kwang-shi.
Sun—Rises 5hr. 36min.
Sets 6hr. 20min.
High water—Morning 1hr. 33min.
Afternoon 2hr. 53min.
Low water—Morning 5hr. 2min.
Afternoon 7hr. 57min.

ANNIVERSARIES.
1843—The Duke of Sussex, the Queen's uncle, died.
1860—Chusan occupied by the British fleet.
1864—About 100 prisoners escaped from the prison hulk off Stonecutters Island.
1869—H.M.S. *Salamis* returned to Hankow from the Yangtze.
1877—Torpedo explosion at Tientsin; six men blown to pieces; narrow escape of Li Hung-chang.
1897—Tyrannos bombed by the Turks.
1898—War declared between America and Spain. U.S. fleet leaves Keywest for Havana.

TO-MORROW.
Sunday, 22nd April, 1900.
Chinese—23rd of 3rd moon of 26th year of Kwang-shi.
Sun—Rises 5hr. 35min.
Sets 6hr. 21min.
High water—Morning 2hr. 2min.
Afternoon 3hr. 58min.
Low water—Morning 4hr. 5min.
Afternoon 7hr. 56min.

ANNIVERSARIES.
1834—The East India Co. ceased to trade with China.
1877—Arrival of Governor J. Pope Hennessy in Hongkong.
1880—Jinrichskas started in Hongkong.
1890—The Foreign Ministers at Peking invited to a funeral ceremony at the house of the late Marquis Tseng.
1897—Wreck of the s.s. *Holme Eden* on the Lulucau Isles.
1896—The leaders of the Reform Committee pleaded guilty of high treason at Pretoria.
1897—Sir Claude Macdonald left Hongkong.
1898—Havanna blockaded. Governor of Philippines issued his proclamation of war.

AGENDA.

TO-DAY.
9 p.m.—Grand Entertainment under Distinguished Patronage in aid of the Indian Famine Fund at City Hall.
Cargo ex *Idomenus* subject to rent.
9 p.m.—Warren's Circus at West Point.

TO-MORROW.
C. N. Co's steamer *Kueiyang* leaves for Tientsin.
P.M.—A. L. S. N. Co's steamer *Maria Valerie* leaves for Fiume and Trieste via the Straits.

CHURCH SERVICES.

St. John's Cathedral—Communion, 7 a.m., 11 a.m., 5 p.m., 7 p.m., 8 a.m., and 9.30 a.m. Benediction, 5 p.m.
Union Church—Services, 11 a.m. and 6 p.m.
German Bethel—Chapel, West Point—Morning Service, 11 a.m.
St. Francis Church, Wanchai—Mass (Chinese), 6 a.m. (Port.), 7.30 a.m. Benediction, 5 p.m.
St. Joseph's Church, Garden Road—Morning Service (English), 9 a.m.
St. Anthony's Chapel, West Point—Mass, 8 a.m.
Wesleyan Methodist Church—Services, 10.30 a.m. and 5.45 p.m.
St. Peter's Seamen's Church—11 a.m. and 6.30 p.m.

MONDAY, 23rd.

9 p.m.—Ada Delroy Company at City Hall.
German School term Commences.

TUESDAY, 24th.

Noon—Extraordinary General Meeting of the Hongkong Hotel Co., Ltd.
Noon—Cargo ex *Silesia* subject to rent.
3 p.m.—C. S. N. Co's steamer *Mausang* leaves for Sandakan via Gaya.
5 p.m.—C. S. N. Co's steamer *Mennuir* leaves for Manila.
(About) N. L. steamer *Sibiria* leaves for Havre and Hamburg.
(About) N. P. steamer *Glengole* leaves for Victoria B. C. and Tacoma.
Cargo ex *Preussen* subject to rent.

WEDNESDAY, 25th.

Noon—C. N. Co's steamer *Tsitan* leaves for Manila and Australian Port.
2.30 p.m.—Auction sale of household furniture at Mr. Paul Brewitt's sales rooms, Zealand Street, No. 2.
C. P. R. steamer *Empress of India* leaves for Victoria B. C. & Co.

FRIDAY, 27th.

Noon—N. Y. K. steamer *Yagashima Maru* leaves for Bombay via Singapore and Colombo.
4 p.m.—N. Y. K. steamer *Yawata Maru* leaves for Sydney and Melbourne, via Manila & Co.
At daylight the Co's steamer *Hingo Maru* leaves for Europe via Straits.
C. & M. S. Co's steamer *Esmeralda* leaves for Havre and Cebu.
C. N. Co's steamer *Singking* leaves for Manila.

SATURDAY, 28th.

Noon—Extraordinary General Meeting of Shareholders of the Green Island Cement Co., Ltd.
Noon—P. & O. steamer *Phangal* leaves for London.
First Gymkhana Meeting of the Season at Race Course.

SHIPPING AND MAIL NEWS.

MAILS DUE.
French (*Oceanien*) 22nd inst.
American (*Hongkong Maru*) 27th inst.
Indian (*Suisang*) 27th inst.
Australian (*Airlie*) 28th inst.
Canadian (*Empress of China*) 28th inst.
German (*Hamburg*) 1st prox.
American (*China*) 5th prox.
Canadian (*Empress of Japan*) 10th prox.
American (*Doric*) 15th prox.

The steamer *Suisang*, from Calcutta and Straits left Singapore for this port on Friday, the 20th inst. at 5 p.m.

The C. P. R. Co., R.M.S. steamer *Empress of Japan*, left Vancouver for Hongkong via usual port of call on Thursday the 19th inst.

The N. Y. K.'s steamer *Yawata Maru*, (Australian Line) left Nagasaki for this port to-day and is expected to arrive here on the 24th inst.

The Imperial German Mailsteamer *Hamburg*, carrying the German Mails with dates from Berlin of the 2nd inst., left Colombo on 20th inst. p.m., and may be expected here on or about Tuesday, the 1st prox.

Departures.

April 21, Hainan, British str., for Swatow.
April 21, Dirigo, American ship, for Honolulu.
April 21, Bankoku Maru, Jap. str., for Hongay.
April 21, City of Peking, British str., for San Francisco.
April 21, Choyang, British str., for Shanghai.
April 21, Haitan, French str., for Hoihow.
April 21, Irene, Chinese str., for Shanghai.
April 21, Eskdale, British str., for Robe.
April 21, Catherine Apat, British str., for Calcutta.

Passengers—Arrived.

Per *Formosa*, from Swatow—52 Chinese.
Per *Glengole*, from Tacoma, & Co.—50 Chinese.
Per *Maria Valerie*, from Kobe—Mr. Munoz and son.
Per *Benvenue*, from Saigon—5 Chinese.
Per *Jason*, from Singapore—Messrs. G. and J. Taylor, and 300 Chinese.
Per *Sungking*, from Manila—Messrs. M. Schmeer, F. Jackson, A. Hockwells, Mons. De La Tour, Romero Salas, M. Alonzo, Censul Hano, Messrs. E. Elern, G. Grielsama and 3 children, and F. Metters. Transferred by s.s. *Tsitan* from Australia—Messrs. H. Bowles, A. Gillot, E. McKenzie, H. Ellis, E. Stringer, W. Fawkes, W. S. Neill, E. Hargreave, R. Anning, Mr. and Mrs. Broadhurst, Misses Anning, Forlong, and 100 Chinese.

Departed.

Per *City of Peking*, for Shanghai—Messrs. H. G. C. Hallock, Lum Kai Sang and servant, Mrs. F. V. Masson, Mrs. Mok She, Mr. A. P. Stocks, Mrs. Chan-See, Mrs. Lee-See, Mr. Lo Fat Hing, Master Ying Yee Lau, 2 Misses Lum, Miss Messrs. S. Kassar, F. McPherson, J. Buge, Masters Loo Kit, Loo and Loo But, 3 Indians, 2 Chinese girls, and 1 Chinese. For Nagasaki—Lieut. Comdr. Bull, U.S.N., and Ensign H. Laning, U.S.N. For Kobe—Mr. and Mrs. E. Walker, For Yokohama—Dr. and Mrs. Kruger, infant and 2 amobs, and Master Kruger. For San Francisco—Dr. and Mrs. E. Lodge, Messrs. Li Au She, Lee Gap, Lee Lung So and infant, Misses Li Quai, Lee Tooy Kan, Gw Gen, Master Lee San, Mrs. John Carroll, Master Irene Carroll, Master John Carroll, Mr. John Carroll, Miss F. B. Fuss McClure, Mr. George Ade, Mr. and Mrs. F. Lauson. For Minneapolis—Mrs. Calder, Miss Edna Calder, and Master Arthur Calder. For Pittsburg—Mrs. E. H. Braddock, and Mr. W. Braddock. For New York—Mr. C. and Master K. Kinck. For London—Capt. Davidson, Master, Mr. and J. Van Aalst, Mr. E. W. Hayward, Dr. Randolph Magness, Messrs. Broome L. Wills and H. Gill, For Havre—Mr. Pierre Blanc.

"FOR THE BLOOD IS THE LIFE"

Clarke's Blood Mixture

**THE WORLD-FAMED BLOOD PURIFIER
AND RESTORER
IS WARRANTED TO CLEAR THE BLOOD**

from all impurities from which disease arises.
For Scrofula, Skin, Eczema, Skin and Blood
Diseases, Blackheads, Pimples, and sores of all kinds,
It is a most effective and permanent cure. It
cures Old Sores,
Cures Sores on the Neck,
Cures Sore Legs,
Cures Itch of the Head or Pimples on the Face,
Cures Nervous
Cures Rheumatism and Stiffness in Joints,
Cures the Cause of Contagious Rheumatic Pains,
It restores the color from the Blood and Hides,
As this Mixture is pleasant to the taste, and war-
ranted free from anything injurious to the most de-
licate constitution of either sex, the Proprietors
solicit sufferers to give it a trial to test its value.

**THOUSANDS OF TESTIMONIALS OF WONDERFUL
CURES FROM ALL PARTS OF THE
WORLD.**

Clarke's Blood Mixture is sold in Bottles of 2s.
each, and in cases containing six of the quantity,
12s.—sufficient to effect a permanent cure in the great
majority of long-standing cases—ALL CHIEF
DISEASES AND PATIENTS' MEDICINE VENDORS
throughout the world. Proprietors, THE LANCET
AND MEDICAL COURTESY, DRUG COMPANY, LINCOLN,
England. Trade Mark—A BLOOD METER.

CLARKE'S BLOOD MIXTURE.
CAUTION.—Purchasers of Clarke's Blood Mixture should
see that they get the genuine article. Worthless imitations
and substitutes are sometimes put out by unprincipled
vendors. The words "Lancet and Medical Counties Drug
Company, Lincoln, England," are engraved on the Govern-
ment Stamp, and Clarke's World-famed Blood Mixture
is the only one to be had, WITHOUT WHICH MORE ARE
GENUINE.

Intimations.

THE FIRST GYMKHANA MEETING.

Mails.

CANADIAN PACIFIC RAILWAY COY'S ROYAL MAIL STEAMSHIP LINE.

SAFETY. SPEED. PUNCTUALITY.
THE FAST ROUTE BETWEEN CHINA, JAPAN AND EUROPE, VIA CANADA AND THE UNITED STATES.

(CALLING AT SHANGHAI, NAGASAKI, YOKOHAMA & VICTORIA, B.C.)
Twin Screw Steamships—6,000 Tons—10,000 Horse Power—Speed 19 knots.

PROPOSED SAILINGS FROM HONGKONG.
EMPRESS OF INDIA...Comdr. O. P. Marshall, R.N.R...WEDNESDAY, 25th April.
EMPRESS OF JAPAN...Comdr. Geo. A. Lee, R.N.R...WEDNESDAY, 16th May.
EMPRESS OF CHINA...Comdr. R. Archibald, R.N.R...WEDNESDAY, 6th June.

THE magnificent Twin-screw Steamships of this Line pass through the famous INLAND SEA OF JAPAN, and usually make the voyage YOKOHAMA TO VANCOUVER (B.C.) in 12 DAYS, saving THREE DAYS to a WEEK in the Trans-Pacific journey, and make connection at Vancouver with the PALATIAL TRANS-CONTINENTAL TRAINS of the CANADIAN PACIFIC RAILWAY which leave daily, and cross the Continent FROM THE PACIFIC TO THE ATLANTIC WITHOUT CHANGE. Close connection is made at Montreal, Quebec, Halifax, New York and Boston with all Trans-Atlantic Lines, which passengers to Great Britain and the Continent are given choice of.
Passengers Booked through to all principal points and AROUND THE WORLD. Return tickets to various points at reduced rates, Good for 4, 6, 9 and 12 months.
SPECIAL RATES (First class only) granted to Missionaries, Members of the Naval, Military, Diplomatic and Civil Services, and to European Officials in the Service of China and Japan Government.
The attractive features of the Company's route embrace its PALATIAL STEAMSHIPS, (second to none in the World), the LUXURANCE OF ITS TRANS-CONTINENTAL TRAINS (the Company having received the highest award for same at recent Chicago World's Exhibition), and the diversity of MAGNIFICENT MOUNTAIN AND LAKE SCENERY through which the Railway passes.
THE DINING CARS and MOUNTAIN HOTELS of this route are owned and operated by the Company, and their appointments and Cuisine are unequalled.

THE attention of Passengers is directed to the very cheap rates offered by the Line, HONGKONG TO LONDON £47.

THE "WEISBACH" SYSTEM OF INCANDESCENT GAS LIGHTING.

(Compiled from Various Sources.)

While the improvement in the different gas burners used, indicated the path of progress, they all failed to realise the full advantage which we now know to be obtainable.

It was reserved for Dr. Auer von Weisbach to introduce the system now so well known by his name.

The first public exhibition of Dr. Von Weisbach's system of incandescent gas light, was made in London in February 1877. At that time there were many fears expressed as to the possibility of the new system being successfully placed on the market on a commercial basis, and for a short while the company had a hard struggle to overcome the difficulties, which are generally met, by those who seek to introduce original work.

These were soon surmounted, and the public are indebted to their untiring exertions for the benefits conferred by such an enormous stride in artificial illumination by means of gas.

The essential feature is the "Mantle" which is woven of "Sea Island" and "Egyptian" Cotton, which has been washed to remove earthy matter and grease. The mantle is at first a network of cylindrical shapes almost twice the size of the finished article. It is then immersed in the lighting fluid, which is composed of the nitrates of thorium and cerium in the proportions of 99% thorium oxide and 1 percent of cerium oxide, the solution containing about 14% of these salts. The excess of the solution is then removed from the cotton rollers, the pressure of which is so regulated, as to leave a definite determined quantity of the solution in the fibres. The mantle is now dried on a mould in a hot air chamber. When dry, the mantles are stretched out to uniform shape, by hand, and then carried to the fixing room, where the top of the impregnated mantle is fixed with a fluid composed of a mixture of another group of rare earths viz.—lanthanum, zirconium, and traces of magnesia, the object being to ensure the shrinkage of that end of the mantle, and to cause it to adhere with which it is subsequently sewn, to form the thickened and supporting end of the mantle. When dried, the mantle is sewn and trimmed, and then handed to the "burners" whose duty it is to first shape the mantle on a wooden mould, and then to burn off the cotton by means of a Bunsen burner flame, thus leaving a skeleton of the cotton thread composed of the oxides of thorium and cerium. This skeleton is then heated from the top downwards, over a high pressure Bunsen burner for 3 minutes, during which process it gradually shrinks to almost half its original size, and is cured to take the required shape. The mantle is now finished and ready for use, but as it is too brittle for transit, it has to be stiffened. This is done by dipping it into a solution of collodion and camphor, after which it is dried by hot air, and thence passed to the packers and trimmers.

The extent to which this industry has developed, may be indicated by the fact that at the Palmer Street works of the Weisbach Company over 30,000 mantles are manufactured daily, no less than 500 girls being employed.

In an interesting account of the Weisbach system, read by the chemist of the Company Mr. W. Mackean, F.C.S., before Society of Chemical Industry in 1891, it is shown, that by altering the nature and composition of the fluid employed for impregnating the mantles, the light obtained can be varied from an intense white light, to a golden yellow or greenish colour, which differ to a certain extent in their diffusive power, the following mixtures giving the lights referred to—

WHITE LIGHT.		
Zirconium oxide 40 per cent.	Zirconium oxide 40 per cent.	Thorium oxide 60 per cent.
Lanthanum 20	Lanthanum 20	Thorium 80
Thorium 40	Thorium 40	
YELLOW LIGHT.		
Lanthanum 40 per cent.	Zirconium oxide 47 per cent.	
Thorium 25	Lanthanum 30	
Zirconium 30	Thorium 20	
Cerium 5		
ORANGE LIGHT.		
Lanthanum 40 per cent.	Zirconium oxide 47 per cent.	
Thorium 25	Lanthanum 30	
Zirconium 30	Thorium 20	
Cerium 5		

These may be considerably altered, without affecting the colour of the light.

According to Mr. Mackean, any other oxides may be employed in the compositions, but the presence of some, such as alumina, and magnesia, are very detrimental to the duration of the illuminating mantle.

The mantle is used by suspending it over a Bunsen burner in which the air and gas are mixed before arriving at the point of ignition, so that there is a complete absence of the ordinary white flame, but in place of which the metallic oxides of which the mantle is composed become heated to incandescence, and yield the brilliant light now so well-known.

At the time of the introduction of the Weisbach system in 1877, the company obtained a duty from ordinary 16 candle gas of about 100 candles. Their 1899 burner increased this to about 17 candles, whilst the latest form the 1898 pattern is claimed to yield a duty of no less than 27 candles of light per cubic foot of gas consumed, and this even with such a low consumption in the case of their smallest sized burner, of no more than 14 cubic feet per hour. This is truly a marvellous development, and when it is considered in relation to the best results obtainable at the time of the Crystal Palace Exhibition of 1882-3 shows the wonderful advance which has been made since then, and advances which promise to be still greater in the case of the incandescent electric light, as by the application of the same principles, viz. the incandescence of these rare metallic oxides, there is every reason to anticipate some early pronouncement of an equally startling character, but of which at present we can only hint, as the initial experiments are not yet fully completed and ready for publication.

AT THE ELEVENTH HOUR.

"Oh, I'm a fraud, really," laughed Daisy Hayward, as she sat up among the cushions of her low basket-couch and held out her hand to her visitor. "There's nothing more the matter with me than a bad attack of laziness. How energetic of you to climb all these stairs, Meg!"

"Your aunt gave a most melancholy account of you," returned Mrs. Dynevor, "but some how I must confess that, as an interesting invalid, you fell flat. Every one is excited about poor little Mrs. Sylvester."

"Why, what has she been doing?"

"Extreme things—in the way of upsetting herself out of her pony-cart, and generally smashing things up."

"Not herself—she isn't hurt really?" asked Miss Hayward quickly.

"I am afraid she is badly; she's such a frail little thing! At the best, that, it seems rather awful."

"Who is with her?"

"Mrs. Dynevor shrugged her shoulders. "The English doctor and her maid."

Daisy Hayward was on her feet. "No one else?"

"I don't think so. Every one is so sorry."

"But no one came to help her," returned the girl rather scornfully. "What's the use of a

maid in a case like this?" And she began to set her hair right in front of the glass in a quick, businesslike fashion.

"What are you going to do?" asked Mrs. Dynevor, as Daisy caught up her hair.

"Going to see if I can be of any use. Can't you imagine what it must be to lie ill in a strange place with only a servant near you?"

"I suppose it is rather horrid," returned her visitor comfortably. "But the sun is simply grilling just now."

"You can wait here till it's cooler. Tell my aunt where I am, and not to fuss if I don't come home to lunch; and without another word Daisy Hayward hurried out of the room."

The villa where Mrs. Sylvester lived was at some distance from the Haywards' hotel, and Mrs. Dynevor had not exaggerated the heat of the streets of Cannes at midday; but Daisy walked fast in spite of everything. The girl was very fond of the woman who was going to see. Something about the fragile, dark-eyed woman, who mixed so little with the other visitors, had attracted her from the first, and though Lady Hayward, the girl's aunt and chaperon, had but half approved of the friendship, since so little was known of Mrs. Sylvester, still Daisy had chosen to cultivate her, and she was the one person with whom the tenant of the Villa des Acacias could be said to be at all intimate.

In spite of her strong nerves and her determination not to be startled, the girl felt her colour leave her face as she entered the darkened room where her friend was; the pale face set in its loosened dark hair, the eager, dilated eyes frightened her.

"I knew you would come," said the sick woman, "Oh, I wanted you so badly, you can't think."

Daisy bent and kissed her. "I'm going to stay here," she said quietly. "Can I send one of the servants back with a message?"

"Is it very bad?" asked Miss Hayward of the maid whom she met in the hall. "She looks ghastly. Where is the mischief?"

"Something internal. The doctor says it will be a miracle if she pulls through; but I say she can't—she's so delicate."

"It's awful!" murmured Daisy, choking down a sob, and trying to compose her face before she entered the sick-room.

"I've been asking them about me? I don't mind really, you know, except that it's horrid having it happen like this."

"Don't talk like that Sylvia. In fact, I don't believe you ought to talk at all, or they'll be sending me away. But, of course, you'll want me to write to your husband, unless they have wired already."

"I wouldn't let them; but I should like you to do something for me."

"Anything?"

"Really, you mean that?" and the dark eyes fixed her with painful intensity.

"Of course I do."

"Then I want you to write to—somebody who is not my husband."

"Sylvia."

"Something like a laugh—or was it a gasp of pain—came from the bed."

"I don't understand," stammered Daisy.

"How should you? It seems an unparadiseable thing to ask you to do—you, a girl. But I'm dying, Daisy—I know it—and my life hasn't been a happy one."

"Tell me," returned the girl in an uncertain voice.

"Isn't what you think—at least, not as bad, only—Oh, how can I make you understand? I've been married nearly ten years. My husband is kind enough, good enough, but I'm no more to him than anything else in his house—just a part of the establishment, don't you know, like the old Dresden in the drawing-room; something which is necessary in a well-appointed room. It would grieve him if I were to leave him, but he wouldn't care. You can't quite replace either—that's all. A bitter little laugh came from the white lips, and she paused a moment. "The only things my husband really cares for are Egyptian mummies and Sanskrit inscriptions, and that sort of thing. I am too modern to count, you see; but there is—I mean he has a secretary, a distant relation of some sort, and—" she stopped, and a faint flush had gathered on her pale cheek.

"Yes. He cares. Ah, I know—I've known it for years; though he never said a word, we understand each other. Can't you realise, can't you see that there is only one chance of happiness left for me?—to meet him again, to feel his arms round me for the first and last time, and to whisper the words my heart has been breaking to say all these years."

The passion of her speech was shaking the fragile frame. The bloodless hands were clasped in wild entreaty.

"It isn't much to ask, is it? Some women have loved beside them all their lives; I ask for it only for one short hour, the last before the outer darkness."

The entrance of the doctor broke in suddenly upon the strained situation. Daisy Hayward was waiting for him as he came out.

"It's a bad case," he replied in answer to her look. "It's good of you to be with her, Miss Hayward; but you ought not to be alone."

"You think—"

"He nodded."

"Do it, whatever it may be. By the way I suppose her people have been communicated with? If I can be of any use, you know, I am quite at your service," he said, and returned to Mrs. Sylvester's room.

"Well?" The word was little more than a whisper, but its eager intensity was almost painful.

"Where shall I find the address?" said Daisy quietly.

"I will dictate it to you—Thornton, 113 Queen Anne's Gate."

"What shall I say?"

"There's no time to break the news. Say, 'Sylvia dying—come at once.'"

"I am afraid she is badly; she's such a frail little thing! At the best, that, it seems rather awful."

"Who is with her?"

"Mrs. Dynevor shrugged her shoulders. "The English doctor and her maid."

Daisy Hayward was on her feet. "No one else?"

"I don't think so. Every one is so sorry."

"But no one came to help her," returned the girl rather scornfully. "What's the use of a

maid in a case like this?" And she began to set her hair right in front of the glass in a quick, businesslike fashion.

"What are you going to do?" asked Mrs. Dynevor, as Daisy caught up her hair.

where she was. Sylvia's little cry, the ghastly change in her face, arrested her; but before she had time to think the stranger was on his knees by the bedside, and the girl could see his big hands tremble as they stretched towards the tiny figure which reclined there.

"Sylvia, my darling—my poor little wife! It isn't true—I can't believe it! You must live, you must!" And the girlized head buried itself among the bedclothes, while the man's body shook with tearful sobs.

"Henry?" Daisy's eyes opened wide as the significance of the situation dawned upon her.

"You came—yes."

"Did you think I would not? Your telegram was addressed to Thornton, but he's away, and they brought it to me. He's been away some time now. Didn't I tell you? He's engaged to one of the Grainger girls, and has gone to stay down there."

Daisy felt her heart stop beating as these words struck her ear. She made a step forward, but at that moment Sylvia's eyes met hers; and then, without a word, the sick woman's head dropped upon her husband's shoulder, and Miss Hayward stole softly from the room.—R. Times.

WHEN HER MAJESTY IS AFLOAT.

THE ROUTINE IS MOST CAREFULLY PLANNED.

The occasions during her lifetime upon which the Queen has passed a night at sea may be counted upon the fingers. They were all in the early days of her reign, when sailing from London to Scotland, and later on, when cruising down Channel and in the Hebrides. Within the last twenty years her Majesty had paid seventeen visits to Germany, France, and Italy in the spring, but during each voyage, if the night was spent on board at all, the royal yacht was always safely moored in harbour. The Queen has occupied a sleeping cabin no fewer than 150 times all told, but she has been aboard during daylight trips—as when crossing the Solent—about 150 times as well.

If the time spent by her Majesty afloat were collected into one continuous cruise, instead of being scattered over about seventy years, it would not fill six months. The Queen has never travelled farther north than Loch Brora, near Dunrobin, or farther south than Hyeres, in the Mediterranean, a distance by latitude of 900 miles. The most westerly point of any of her journeys is Killarney, and the most easterly is Germany. Yet the three yachts which in their turn have borne the name of "Victoria and Albert" have cost upwards of £600,000 in initial expense, and an equal amount in repairs, apart from the pay of the crews, and many other items of maintenance.

In the year 1885 the second "Victoria and Albert" was launched, and her cost up to that time was £136,441. She is a wooden, copper-sheathed paddle boat of 2,470 tons, with a length of 338 feet, a maximum indicated horsepower of 2,400, and a normal speed of fifteen or sixteen knots.

A new yacht, to bear the same name, has been launched at Penbroke in the present year. She will cost before her first voyage £360,000, and is a twin-screw steel vessel with a length of 339 feet, a tonnage of 4,700, indicated horsepower of 11,000, a speed of twenty knots, and accommodation for a crew of 378. Her most interesting feature will be the electric installation, which, lighting the vessel, will also heat the State cabins, work the lifts from deck to deck, the pumps, hoists, capstans, and ventilating fans.

The routine observed when her Majesty goes to sea is carefully planned out. As soon, for example, as it has been determined that the Court shall move to the Isle of Wight, the Equerry-in-Waiting notifies the railway authorities, and the view of the scenery, the commander of the royal yacht, who thereupon arranges to be alongside a wharf at Portsmouth or Gosport the night before. All men on furlough are recalled from leave, and everything is made spick and span. The heavy baggage arrives by an early train, or is conveyed by another vessel the day before. The personal luggage of the members of the Household, and the boxes which always accompany the Queen, are transferred from the train to the hold of the yacht within a space of twenty minutes or so.

At length everything is in readiness to depart, and the Queen is assisted into a wheeled chair, which is conveyed to that part of the yacht which is most nearly upon a level with the quay. Thence she is conveyed to the level of the main deck, where she walks along the broad and handsome corridor, which leads to her own apartments.

Sometimes, especially when a crossing of less than an hour's duration is in progress, the Queen remains on the upper deck in the royal pavilion. This is twenty-five feet long each way, and it has three large square windows, enabling a view of the scenery to be obtained without exposure to the wind. There are a couple of sofas and several easy chairs and tables, and when her Majesty is afloat all the saloons used by her are made gay with flowering plants. There is a painted porcelain stove, which is always used during the winter journeys, and the windows are hung with filled muslin curtains.

When the Queen crosses the Channel, in order to proceed across France to the Mediterranean, the preparations are far more elaborate. As soon as her Majesty has embarked, the ships in harbour dress the yards, and everything is made gay with bunting. By express command the royal salutes to which she is entitled are omitted, because the detonation causes discomfort. The usual arrangement is for the Queen to embark overnight, and for the yacht to be hauled off shore to her moorings, which she leaves at an early hour on the following day. This enables the journey from Windsor to Cherbourg to be accomplished in two days, and the nights are spent in harbour. Even if the crossing be to Cologne, as last year's arrangements were, one night abroad is made. The vessel is accompanied by a Trinity House yacht and an Admiralty cruiser, and every precaution is taken against the intrusiveness of inquisitive boating parties when the yacht is in harbour. The new yacht, by means of a Marconi installation, will be able to maintain uninterrupted communication with the shore at every moment of the voyage.

Her Majesty's apartments are three in number. There is a cabin with a brass four-poster canopy bedstead and a huge sofa; a dressing-room, containing a writing and toilet table combined; and a wardrobe-room, occupied by the dresser. In the new yacht each of these cabins is larger and more lofty. The dining-room is in mahogany, and contains portraits of former captains. The drawing-room is in maple, and bears portraits of the Royal Family upon its walls. There are a piano, a book-case, and a portable electric lamp. In the new yacht also the Queen will have similar accommodation, but on a larger scale.

All the crew of the royal yacht are petty officers, of a certain height, and having the best characters. They are reduced in rank and pay, and begin at 14s. per week, but afterwards rise to 28s. per week, with free clothes, better food, and less exacting duties than in the regular service. They do no washing, they have no working clothes, and are obliged to volunteer for a twelve-month as a minimum. In the new yacht they will have hot and cold baths, electric ventilation, natural light to all cabins, and generally speaking will be in very comfortable quarters.

A story which is always repeated whenever men of the royal yacht meet, runs that on one occasion the crew were unable to get at the frog cask because the Queen's chair was in front of it. On being apprised of this, her Majesty consented to move, on condition that she was permitted to taste the frog, to the delight of the Blue-Jackets.

On one occasion only has the Queen visited a royal yacht on Sunday. It was during the convalescence of the Prince of Wales, eighteen months ago, when he was in the "Osborne," recovering from the injury to his knee. Divine service was read in the hearing of the royal patient, and her Majesty remained for some time to cheer her son.

THE ODD MAN ON THE JURY.

"There you are, miss, said the police-constable, throwing open the door of cell No. 11. His prisoner, a fair young woman of great personal attractions, shuddered as she looked into the bare place. The officer was about to lock her in when she spoke to him.

"At what time will the hearing be?" she inquired.

"Can't say exactly. Somewhere between eleven and twelve most likely," answered the officer, who then turned the key and went off.

The pale prisoner laid her face upon her hands and sobbed piteously. Two hours' freedom and hope unlimited were hers, and as Sister Winifred, of St. Margaret's—one of the most popular hospitals of South-western London—she rejoiced in the possession of the confidence and respect alike of the heads of the institution and her fellow-workers. Now behold her charged with a disgraceful theft; and without the means of proving her innocence.

That afternoon Sister Winifred had been on the point of going off duty when she had been arrested on a charge of having taken a lady's bicycle—not her own—from a suburban junction. Doctor Stanmore, the house surgeon at St. Margaret's and Winifred's devoted but as yet unacknowledged lover, and the matron and chaplain had all three seen the police officer, and smilingly assured him that it was a case of mistaken identity.

Their assertions had been received with stolid indifference, and in the evening a cab was called, and Sister Winifred was carried off to the police station. On this painful errand the doctor and matron accompanied the terrified girl, and offered bail, on behalf of the hospital authorities, to whatever amount might be required. This—by an excess of duty as afterwards appeared—was refused, and poor Winifred was finally committed, as stated, to the solitude of cell No. 11, there to await conveyance on the morrow to Wandsworth Police Court.

The morning was well on when the prisoner received her summons. She turned quite faint upon finding herself face to face with a crowded court, and it was all she could do to keep back the tears of shame and terror.

The doctor and matron were present, and both smiled at her in the most heartening manner. These smiles, however, slowly evaporated as the case took its painful course. Appearances, alas! were dead against the prisoner, and the railway company, who had lately been severely victimised by the "bicycle thief," seemed determined to make an example of the present offender.

The chief witness was Grimsby, the railway porter, who swore most positively to Sister Winifred as the person who had presented a paper signed Ellen Humphries, and to whom he, in consequence, had delivered the bicycle. The machine in question was the property of Nurse Ellen, also an official of St. Margaret's. She had been spending her holiday in Staines, and in returning to London had left the bicycle at the Junction to be called for between four and five o'clock the same day. Subsequently, being unable to go herself, Nurse Ellen had purposed sending a messenger, and had written an order, authorising the bearer to receive the machine.

This order had most mysteriously disappeared, and had, it was alleged, been appropriated by Sister Winifred, she being the only person who knew that the bicycle was deposited at the Junction, and herself desperately eager—as was well known—to possess a machine. On the afternoon of the theft, moreover, the prisoner had unexpectedly made a request for a few hours' leave to see an aunt of hers, and was absent from the hospital from three to six.

Now this aunt was known to live at Battersea; and the accused had no means to prove the alibi which the solicitor for the defence set up for Sister Rymer, the aunt mentioned, was absent from home at the time, and her niece had entered the house by means of the latchkey which she possessed. The statement made by the defence, to the effect that the accused had sat reading in her aunt's armchair until it was time to take the return journey, could in no wise be proved, unfortunately, for neither on arrival nor departure had Winifred been noticed even by a neighbour.

That which the girl herself, which her supporters most feared, occurred. The magistrate sent the case for trial.

The next day, ball having now been accepted, the unfortunate sister returned to her post at St. Margaret's, in deference to the emphatic desire of the authorities there. No stone was left unturned in collecting funds and evidence; yet it was with a quaking heart that the devoted lover saw the eventful day of the trial approach.

II.

The momentous morning arrived.

Mr. Octavius Graham, the noted popular counsel engaged for the defence, made short work of the minor witnesses. Nurse Ellen became his especial victim. It was known that on a recent occasion Sister Winifred had caused the former to be reported for absence of duty; and counsel openly taxed her with having involved his client in this shameful business from sheer spite and vindictiveness.

Finding he could not shake the testimony of Grimsby, the porter, he cast stinging ridicule upon the idea of a man in his position swearing to the identity of one particular woman among the hundreds he must see through the day. Finally he bore glowing witness to the blameless life of the accused, and demanded of the jury the honourable acquittal which he declared was his client's due.

No one could mistake the judge's summing up; no jury could possibly acquit in face of such evidence as had been put in. Winifred gave herself up for lost.

Scarcely a creature moved after the "twelve men good and true" had left the court, for their immediate return was expected by all. Yet they did not appear for some time. Well-nigh an hour passed before they re-entered the court.

"You cannot agree, your lordship," said the foreman.

"You cannot agree!" cried the judge in astonishment.

"No your lordship; eleven of us are of the same mind, but the other man disagrees."

"Do you mean," asked the judge, "that eleven of you are for a verdict of guilty, and the twelfth man is not?"

"Yes, your lordship; according to the evidence we were bound to find the prisoner guilty."

"It's me that's the odd man amongst you," here said a dark, sad-faced individual, seeing the counsel openly taxed her with having involved his client in this shameful business from sheer spite and vindictiveness.

"I don't see how the witness Grimsby could swear to one woman in all that crowd, your lordship; and by bringing the prisoner in, guilty, I should go against my conscience."

There was a moment's dead silence. The judge then gravely called upon the prisoner to surrender in due time to a second trial, allowed the bail tendered to stand good, and dismissed the case.

Winifred cast one heartbroken look upon her lover, and fell half fainting into the matron's arms. As they were taking the wheeled chair to a carriage that was awaiting the hospital party, a bystander stepped deliberately into the sister's path.

It was the odd man on the jury; and so urgent, so appealing, were the looks he cast upon Winifred that she involuntarily stopped.

Dr. Stanmore, however, anxious to get his betrothed away, hurried her into the carriage. The sister glanced from the window as they moved off. On the kerb stood the jurymen, his sombre eyes pursuing her to the last.

As Nurse Doris, in one of the East-End charitable institutions, with whose head physician her family had a personal acquaintance, Winifred Rymer began a new and burdened life. Secretly and quickly she had disappeared from St. Margaret's, determined to efface herself as far as possible for the present. Letters and messages were left for all concerned, but until the time of the second trial should be at hand Winifred's fixed resolve was to see no one save the solicitor who had acted for her in the case.

The girl was the mere shadow of her beautiful and buoyant self, the shame, the mystery, of that tragical change being ever with her. The thought of that dissatisfied jurymen pursued her, too. Something deeper than a passing pity seemed to actuate the man when he sought her out after the trial. Yet what interest could she, a complete stranger, have for him?

One morning—it was within three days of the second trial—Nurse Doris was pondering the matter when a poor creature who had been run over was brought into the accident ward where Winifred was on duty.

Internal injury. No hope. An hour at the matron's, whispered the doctor after a brief examination.

Nurse Doris drew the screen about the bed, and sat down beside the dying woman. Presently she opened her dull eyes, and, lifting her head, looked fixedly at the nurse.

"Sister Winifred!" she said with a gasping breath, and fell back upon the pillow.

"You know me?" whispered Winifred.

"I was there—in the court—when it wasn't you who—where—the lids dropped over the falling eyes."

Winifred sank down at the bedside.

"You know the truth!" she sobbed. "Oh, you are a dying woman, as you hope for mercy, tell me who was the thief!"

The poor soul made one expiring effort to speak; but with the words on her lips she died. Later Nurse Doris was found stretched in a deep swoon across the body of the dead woman.

In the evening of that day Winifred, white and worn from the morning's shock, had a summons to go to see a visitor who had arrived at the hospital in connection with the deceased woman.

On entering the waiting-room Nurse Doris found herself face to face with the odd man on the jury.

"Sister Winifred!" he gasped.

"Silence!" said she sternly. "I am Nurse Doris here."

"Nurse Doris!" answered he, and his face went white. "Then it was you who attended that poor soul now lying dead?"

"Yes. Do you know her?" cried Winifred; and a wild hope of restitution, of salvation, thrilled her from head to foot. "This woman was in the court on the day of the trial. She called me by my true name. She would have told me the truth, but she—she—died. Do you know, asked she chokingly, what it is she would have said to me? Ah, you do! Speak, man. Who is this woman?"

"She was my wife," answered he brokenly.
